## Investment Universe

- U.S. issues and ADRs: Unconstrained; can add MLPs, REITs, or commodity ETFs if appropriate.
- No options or individual leveraged or short positions.
- May use inverse ETFs if appropriate.

## Strategy Strengths

- Top-down macroeconomic analysis utilizing proprietary tool with thematic overlays.
- Tactically adjusts sector / Industry exposure. Can be concentrated, including up to 100% cash.
- History of both preservation of client capital and long-term capital appreciation.

## Strategy Philosophy

Our philosophy is based on two guiding principles: (1) we believe risk management transcends everything and (2) risk management occurs by investing around shifting probabilities. By listening to what the market is telling us, we make industry, sector, and portfolio wide allocation decisions, seeking to generate attractive returns with below-market risk over a

full market cycle.

These core investment principles have been the focus of the strategy since inception. We believe in order to realize the full benefits of the strategy, the primary performance objective of generating attractive risk adjusted returns is achieved over a full market cycle (5-7 years).
